

Using EFT (Emotional Freedom Technique) For Weight Loss

WELCOME!

Keep in mind this is *your* time. We will tailor it to meet your specific needs. It is a very individualized approach based upon your answers to my questions. I will be very flexible and to do what works best for you. Your job is to keep an open mind and trust your intuition to guide you along the way. Let's get started!

LEARN THE BASICS OF HOW TO TAP WITH EFT

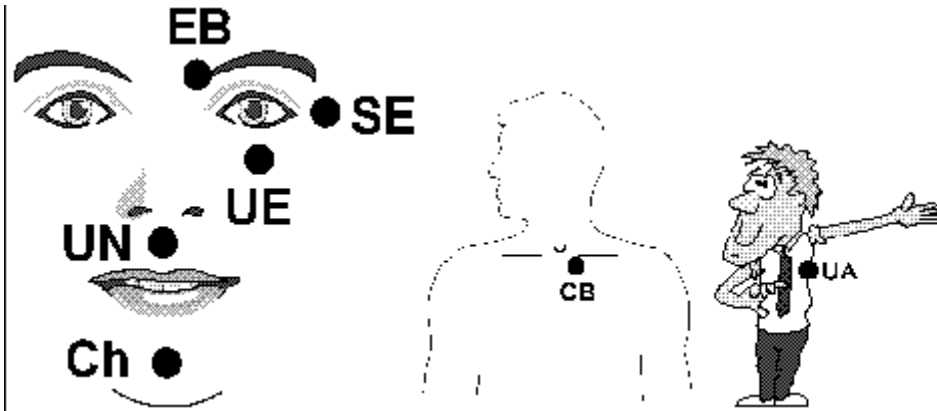

I recommend that you go to Gary Craig's www.emofree.com website and download the free manual. You will want to do this if you are the type of person who needs to know *why* this works and to read the various legal disclaimers. You will learn about the setup phrase, tapping points, how and why EFT works, etc. in great detail. I've taken a lot of the standard verbiage in this section from Gary's report. If you don't want to delve into his detailed 79 page report, you can simply scan it over and/or follow the basic instructions below. Note that most EFT practitioners don't follow the long EFT tapping sequence also called the Basic Recipe found in Gary's report (not even Gary). Instead, they follow a short cut or some variation of a shortcut which I describe below.

- 1) ***The Setup.*** Sometimes it's as if our energy "batteries" are put in backwards. The tapping will not be effective if this is the case. So we do the Setup so that your energy flows properly. Repeat an affirmation that is appropriate to the issue you are working on three times. For example, you might say, "Even though I feel insatiable around food, I deeply and completely accept myself." While saying this, you will do one of the followings:
 - a) Rub the sore spot (recommended method). To find this, go to the base of the throat about where a man would knot his tie. Poke around in this area and you will find a U shaped notch at the top of your sternum (breastbone). From the top of that notch go down 3 inches toward your navel and over 3 inches to your left (or right). The left side is preferred because 75% of lymphatic congestion is found here, and you can also rub both sides at the same time if you like. You should now be in the upper left (or right) portion of your chest. If you press vigorously in that area (within a 2 inch radius) you will find a "Sore Spot." spot is sore when you rub it vigorously because lymphatic congestion occurs there. When you rub it, you are dispersing that congestion. Fortunately, after a few episodes the congestion is all dispersed and the soreness goes away. Then you can rub it with no discomfort whatsoever.
 - b) Tap on the Karate Chop point (perfectly useful if you don't like sore spot) located at the center of the fleshy part of the outside of your hand (either

hand) between the top of the wrist and the base of the baby finger or...stated differently....the part of your hand you would use to deliver a karate chop. Instead of rubbing it as you would the Sore Spot, you vigorously *tap* the Karate Chop point with the fingertips of the dominant hand. You can even chop the two karate chop points together using both hands.

2) **The Sequence.** Tap on the end points of the major energy meridians in the body, while repeating a reminder phrase such as "I feel insatiable." This is the method by which the "zzzzzt" or energy disruptions in the energy system are balanced out. Before locating these points for you, however, you need a few tips on how to carry out the tapping process. Tap solidly but never so hard as to hurt or bruise yourself. Tap about 7 times on each of the tapping points. I say about 7 times because you will be repeating a "reminder phrase" (covered later) while tapping and it will be difficult to count at the same time. If you are a little over or a little under 7 (5 to 9, for example) that will be sufficient. Most of the tapping points exist on either side of the body. It doesn't matter which side you use nor does it matter if you switch sides during the tapping. I recommend that you tap on both sides of the body in the order presented below, but it's up to you. And pay attention to those points that feel good and resonate with you. Sometimes you may find it necessary to only tap in one spot if you get results there. There are eight points that I recommend (see pictures below):

- a) EB—Beginning of Eyebrow. This point is just above and to one side of the nose.
- b) SE—Side of Eye. This point is on the bone bordering the outside corner of the eye.
- c) UE—Under the Eye. This point is on the bone under the eye, about 1 inch below the pupil.
- d) UN—Under the Nose. This point is on the small area between the bottom of your nose and the top part of your upper lip.
- e) CH—Chin. This point is midway between the point of your chin and the bottom of your lower lip (the dimple of your chin).
- f) CB—Collarbone (beginning of collarbone). This point is the junction where the sternum (breastbone), collarbone and the first rib meet. To locate it, first place your forefinger on the U-shaped notch at the top of the breastbone (about where a man would knot his tie). From the bottom of the U, move your forefinger down toward the navel 1 inch and then go to the left (or right) 1 inch.
- g) UA—Under Arm. This point is on the side of the body, at a point even with the nipple (for men) or in the middle of the bra strap (for women). It is about 4 inches below the armpit.
- h) Top of Head (not shown in Gary's report or below but used a lot). This point is located at the top part of the head towards the back.

3) Test yourself before and after the tapping to see if you are less intense on the issue on a scale of 0 to 10, with 10 being the highest intensity. The goal is to get to zero when you tune into the issue.

WHY YOU OVER/UNDER EAT OR TRY TO CONTROL YOUR FOOD

We often eat for emotional reasons such as feeling deprived or insatiable or lonely or anxious or bored. Basically, we aren't comfortable sitting with our feelings. This is understandable because sometimes they are pretty ugly. Food soothes our raw feelings. We doubt that we can cope without our food crutch. It helps us to feel secure in a sometimes scary world.

We often don't really want to lose weight. We may think we do, but on a subconscious level, we don't. Maybe we don't because losing weight isn't safe. It's not safe for various reasons. Who will you be if you lose weight? How will other people see you? Who will be mad at you or resent your success? Do you run the risk of losing your identity and your peer group? What will see you through the daily anxiety of life?

What is your theory as to why you're over or under weight? How do you view your body? Do you have a distorted body image? What is your relationship with food? Do you try to maintain strict control over what you eat because you're afraid of gaining weight or getting fat? Do you binge and purge (bulimia), or are you anorexic? What happens when you binge and don't purge? Why do you want to do something differently now? What put you over the edge?

How would you feel if I told you you couldn't eat dinner tonight? How would you feel with small portions on your plate? What would come up for you—deprivation, loss, abandonment, loneliness, anger and/or panic? Throwing away food may lead to waste and feelings of guilt and other guilt issues. There are many layers as to WHY we eat.

The below EFT phrases often start with your negative emotions, but you will notice that they often switch to positive, choice statements. By doing choice statements, it's like we are accepting ourselves with two different feelings. It's as if our conscious and subconscious minds are debating and integrating.

People very often struggle with their weight and food issues because they have internal objections in their mind (often unbeknownst to them) that keep them from achieving their desires. They have beliefs that keep them stuck. You have to ask yourself “Where did I learn these beliefs? Who taught me that?” Try to trace your beliefs back to specific events in your life. Then we tap on those specific events.

CRAVINGS

Food allergies can be a real block to losing weight, and often we don’t even know we’re allergic to various foods. If you crave something, you can almost be assured that you are allergic to it, and your body is not absorbing it properly. You can treat allergies with EFT just like you treat emotions. The result is that you no longer crave the food, and thus you make an easy choice to not eat it anymore or you significantly reduce your portions—not through willpower though.

Preferably, have the food that you can’t seem to resist (chocolate, chips, M&Ms, etc.) in front of you. Smell it. Imagine eating it. Test yourself to see how much you want it (on scale of 0 to 10 with 10 being the highest). Then we’ll do some tapping to relieve the cravings.

Even though I have this strong craving for _____ ...

Even though I know I’ll feel deprived if I get over this problem...

Even though I really want to eat this food right now...

TAP: This terrible craving. This strong craving. I feel deprived. I need to eat this food right now. This terrible craving.

Even though I still feel deprived and hungry for something...

Even though I feel deeply deprived and I’m insatiable, I can accept my feelings anyway.

Even though I still feel deeply deprived and want to fill it with food...

Even though I still feel hungry and empty and deprived...

TAP: This remaining deprivation. My deprivation makes me crave food. I still crave my food. I still feel this craving. Remaining cravings. Remaining deprivation. Remaining insatiability. I’ve always felt deprived. I’m scared of my deprivation. I feel deprived.

Enough was never enough and still isn’t. Enough IS never enough. Maybe I can allow myself to relax a bit. Maybe there is enough. Maybe I can fill myself by loving and accepting myself. I now choose to feel whole and strong no matter what. Food is just food. I now choose to feel safe without the food.

URGES

Even though I have these strong urges to eat, I choose to be peacefully indifferent to food.

Even though I love food and it tastes good, I know it’s not what I need, and it will not fill my emptiness...

Even though food is comforting and it soothes me, I choose to slow down and focus on what I need...

TAP: This urge to eat. I have to have it. I'm trying to fight it. It's hard to let go. It's what I've always turned to. I need my comfort food. I need calming. I want what I want. I don't know if I can make it without food. I know it's soothing but it's not what I need. Food is just food. I choose to accept where I am. It will be OK. I love having a choice. I can choose food when I want it. Food is no big deal. It will be OK. All is well.

If you only used EFT to help manage and reduce cravings and urges to eat, it would be invaluable. However, the cravings will keep recurring if you don't address the underlying emotional reasons for wanting to eat. People also experience sheer frustration when it comes to losing weight and food issues. They have ingrained underlying beliefs about their body, their ability to lose weight, fear of never getting over the food/weight problem, and on and on. The situation can feel really hopeless. The following tapping sequences address these emotional scenarios and help to collapse the limiting beliefs that block weight loss success.

TAP: I'm hanging on to weight like it protects me. For whatever reason, I'm hanging on. That was then. This is now. It's time to let go. It's OK to let it go. It's not serving me now. It's OK to let it go. I allow myself to let go of extra weight. I prefer to release this weight. I will be able to handle whatever comes. I have all I need. I'm ready to let it go. It's my own choice. It's safe to let it go.

Even though I'm afraid I'll never get over this problem, I'm working on accepting myself more and more...

TAP: What if I never get over it? What if I never get better? What if I have to struggle my whole life? So scary. I'm afraid it will never get better. I've tried so hard it seems like it will never get better and that scares me. I love and appreciate exactly who I am. I choose to breathe deeply and stay calm. I choose to focus on how I feel. Part of me wants to rebel and it keeps me stuck. I choose to let it be easy. It's OK to allow change. I can handle it. It's a relief to finally get unstuck. I have decided not to rebel. Even though I feel like I'm not strong enough, I choose to feel peacefully in control around food...

Even though I feel like I'm struggling with control, I choose to surrender...

It feels like I'll never get over this problem. I've struggled with this for so long. The more I try to control it, the less control I have. It feels like a vicious cycle. I'm ready to get out of the cycle. Maybe I don't need to control everything. It's OK to let go. I choose to feel relaxed. Maybe I can let it be easier. I choose joy. Maybe there is an easier way. I'm open to finding it. I now choose to surrender.

Even though no one in my family is thin... (OPTIONAL)

TAP: It's so discouraging. I feel so frustrated. Sometimes it feels hopeless. I'm even afraid to hope. Why bother? I feel so defeated. I don't want to go through this again. Sometimes it just feels pointless. I failed so many times. It's time to make peace with my failures. I choose to make peace with my failures. I honor myself for how hard it's been and for not knowing what to do. I am open to forgiveness. I choose peace. I choose serenity, relaxed and calm. I now choose to believe.

I don't want to wait this long. I choose to accept the process. I choose to stay calm even though I have to wait. It won't help me to get discouraged. Maybe I could start to accept this as a new beginning. I know it's not easy but I've done it before. I choose to be patient and stay on my plan. I will succeed. I choose to find a creative way to make it easier.

TREAT SELF-IMAGE ISSUES

Reality will always match your self-image. If you change your image, you'll change your external form. You can do anything you put your mind to, but where is your mind? What do you think about constantly? If you think that you look too fat or unacceptable, you can see how this isn't helping your cause. Your subconscious mind will do everything possible to fulfill your self-image. If you have a negative self-image, then we need to use EFT to clear the blocks to your positive self-image.

Can you see yourself at your ideal body size? Can you hear someone telling you how good you look? Can you physically feel how your body would feel at your goal? Can you feel it emotionally?

You need to see it, hear it, feel it, know it and sense it in order to achieve your desired body. What you see in your mind's eye is what you get. You magnetize what you vibrate or think about. Your thoughts are very powerful. This is called the law of attraction. It would also help to repeat affirmations to yourself or aloud several times per day, such as "My normal weight is XXX and that is what I weigh now." See it and believe it.

DIFFICULTY IMAGINING YOUR IDEAL GOAL WEIGHT OR BODY SIZE

Even though I can't picture myself with my ideal body or at my GW ...

Even though there are emotional blocks to seeing myself at my GW...

Even though something is in the way of seeing myself at my GW...

Even though I have blocks to reaching my GW in my mind and in my body...

TAP: I'm having trouble picturing myself at my GW. Something is blocking me from seeing myself at my GW. I can't picture myself. I can't seem to reach my vision. I'm not sure what it means to be at my GW. I have blocks in my mind to reaching my GW. I now choose to see my ideal body image. I now choose to hear the words of praise about how good I look. I now choose to feel the peace and contentedness of living in my ideal body.

HATE MY BODY

Even though I have a negative body image and I reject my body, I'm allowed to and deserve to feel good about my body now.

I now choose to be grateful for the strength in my body. I now choose to appreciate my body. I'm allowed to and deserve to feel good about my body now even if it's not perfect. I can accept my body.

Even though I know I inherited this body type/shape...

Even though I believe I was meant to look/be this way...

Even though I was told I'd be overweight as an adult... (OPTIONAL)

TAP: I inherited this body shape. I am meant to look this way. I have a naturally slow metabolism. I'm destined to be overweight. That's not true. Am I stuck in this body type? I can make choices. I now choose to see myself in a different way. Maybe things can be different. I now choose to believe I can be thin. My beliefs create my reality. I now choose to change my beliefs.

Even though I hate my body no matter what I weigh or how much I eat...

Even though I feel pressure to eat perfect amounts and have perfect body...

Even though I can't tolerate being a little overweight...

Even though I really hate my body and reject my body...

Even though I think my concerns aren't valid and think people criticize me for having them, I still hate my body anyway but I can accept myself and love myself even though I don't accept my body.

TAP: I hate my body and I don't accept my shape. I wish I were different. I reject my body. I hate my body and always have. I hate my proportions. Maybe I could ease up on myself and my expectations. Maybe I can begin to appreciate my body and focus on my strengths. I now choose to be grateful for my body. It will be okay.

Even though I'm ashamed of my body and what I look like...

Even though I'm ashamed of the conflict I have about my body and that I torture myself with eating, thoughts, fears, control...

Even though I'm ashamed of my self hatred and all the energy it wastes...

TAP: I have this conflict about my body. I feel ashamed of my body and trapped in my body. I feel trapped by my thoughts and my body. I feel trapped by what other people have said. I feel trapped by what I think. I feel trapped and conflicted in my body and in my mind.

Even though I feel angry about the trap I've been in...

Even though I feel angry for not being allowed to be...

Even though I feel grief over the trap I've been in all these years...

Even though I feel angry about the waste of time...

TAP: I feel angry about the trap. I feel angry about the waste of time. I feel sad they couldn't accept me. I still feel angry for their disapproval and criticism. I didn't deserve it. I should have been accepted. I feel sad about the trap I've been in. I now choose to release this anger. It's not serving me. I now choose to forgive myself for the wasted energy and time. I now choose to love and accept myself. I am okay the way I am.

It's important to be able to imagine the self-image you want by doing the following:

1. Choose a successful ending. Describe your vision.
2. Pretend/imagine that you can see yourself having accomplished your goal.
 - (a) See yourself from afar, as if in a mirror.
 - (b) See your world from inside you.

3. Imagine *hearing* two important people in your life acknowledging that you reached your goal, congratulating you, and responding to the news of your success.
4. Imagine/access how your body feels *physically* now that you reached your goal.
5. Imagine/access how you feel *emotionally* now that you weigh your goal weight.
6. What *aromas* do you associate with your success? “Smell” them now.
7. What *tastes* do you associate with reaching your goal? “Taste” them now.
8. Put the entire picture together 3x/day to build neurology, expectations & energy.

The above tapping phrases covered a lot of material on emotional themes. If you want to get even more specific in your tapping, you can add some of the phrasing below to the above sequences. The list below is intended to jog your memory of any potential issues that keep you stuck where you’re at. It is broken down into three categories of limiting beliefs: Present, Past and Future. The list, although comprehensive, is not exhaustive. Feel free to tap on whatever feels right for you. EFT is very forgiving!

For example, you’re at a business meeting and not able to eat, or you’re at a family gathering and not overeating. Repeat the following statements and treat with EFT if they do **not** feel true:

“I feel safe and secure at my goal weight.”

“I feel happy about my success.”

“Even though I can’t afford new clothes...”

“Even though I don’t want to feel the pressure of keeping the weight off...”

“Even though I won’t be able to hide behind the extra pounds anymore...”

“Even though I resent having to maintain control...”

FOLLOW UP

I have given you a lot of great information to get started. I hope you will take advantage of it. Even with this information, most people find it difficult to identify their own core issues and consistently work on them. They are too mired in their own “stuff,” and they are not objective when it comes to their own issues. That is why having a coach can be extremely beneficial. With me as your coach, you can reach your desired results much more quickly because you are more focused and accountable.

EFT works where nothing else does. It’s not your typical diet and exercise regiment. It also can work very impressively and quickly once the core issues and specific events are identified.

If you would like to schedule a free session with me to determine if this program is right for you, please go to www.harmonyharbor.com/qual.html and fill out the qualification form. I will then follow up with you. Be sure to let me know that you attended this call.

*Note: Some of these questions and the tapping phrase material were taken from Dr. Carol Look's EFT Presentation, Using EFT for Weight Loss & Addictions and from Carol Solomon's CD on Weight Loss.
